To: Mr. Timothy Turner
Team Leader, EU "Environmental Protection of
International River Basins" Project

Сс: Mr. Vahagn Tonoyan
Country Water Management Expert for Armenia,
EU "Environmental Protection of
International River Basins" Project

Dear Mr. Turner,

As you are aware, the construction works of the hydrogeological observation well in Aknashen village of Ararat valley of Armenia within the pilot project on "Improvement of groundwater monitoring in Akhuryan RBD of Armenia, including the Ararat Artesian Basin" was substantially completed in March 2015.

Upon completion of the 90-day maintenance period, last week our specialists visited the site, and confirmed that the technical condition of the rehabilitation groundwater monitoring well is satisfactory and no fix-up activities are required.

There, we would kindly ask you to proceed with the final payment to the construction company.

Thank you for your cooperation.

Sincerely,

Karlen Hakobyan
Director,
Hydrogeological Monitoring Centre of the
Ministry of Nature Protection of the Republic of Armenia
