Pilot project fiche Pilot project 2 in Armenia (PPAM02)

Country	Armenia
Name	<i>Improvement of water resources management and ensuring efficient water use through development of a system for an automated, centralized, on-line control of actual water use in Metsamor (Sevjur) River basin of Akhuryan BMA of Armenia</i>
Contact person:	Vahagn Tonoyan vahagn.tonoyan@blacksea-riverbasins.net
Budget	38,600 Euro
Timing	17 November 2014 – 17 November 2015
Short description	The overall objective of the pilot project was to regulate surface and groundwater use in the basin, ensure transparency and tighten up policing through development and introduction of automated and centralized control system. Development and introduction of water use on-line control system was done using modern technologies with the intent to replicate throughout the country. The data collected by the automated, centralized control system aims to ensure continuous registration of actual water and be accessible for all stakeholders.
Outputs	Inception Report Computer programme manual Procurement and installation plan Training materials and report Final Report
