

Environmental Protection of International River Basins Project

This project is funded by
The European Union

A project implemented by a Consortium
led by Hulla & Co. Human Dynamics KG

Pilot project fiche Pilot projects 6, 8 and 9 in Armenia (PPAM06, PPAM08 and PPAM09)

Country	Armenia
Name	<i>Rehabilitation of Akhuryan-Akhurik transboundary hydrological observation post in Akhuryan River Basin District of Armenia, and installation of modern gauging equipment</i>
Contact person	Vahagn Tonoyan vahagn.tonoyan@blacksea-riverbasins.net
Budget	<u>13,096.98 Euro</u> , of which 1,000.00 Euro (preparation of design documentation and site supervision by the Service of the Hydrometeorology and Active Influence on Atmospheric Phenomena of the Ministry of Emergency Situations of the Republic of Armenia (Hydromet)) 6,097.84 Euro (construction and painting of new bridge) 5,999.14 Euro (delivery and installation of automated hydrological level meter/water gage equipment with radar logger)
Timing	17.Dec.15 - 1.Aug.16
Short description	The overall objective of the project is rehabilitation of Akhuryan-Akhurik transboundary hydrological observation post in Akhuryan River Basin District of Armenia, and installation of modern gauging equipment. Design documents and technical specification of the gauging equipment, as well as site supervision works for the construction were implemented by the Hydromet. Automated hydrological complex (level meter/water gage) with radar logger SEBAPuls 15 was installed.
Outputs	<ol style="list-style-type: none">1. Production of design and contract documents and equipment specification2. Signed certificate of successful completion of construction works3. Signed certification of delivery of gauging equipment
